

Abhishek Kossireddi

Senior Full Stack Java Developer | Cloud & Platform Engineer

kvsabhishek.08@gmail.com | 404-884-9424

PROFESSIONAL SUMMARY

Senior Full Stack Java Developer with 11+ years of experience designing, building, and modernizing enterprise applications across finance, telecom, retail, logistics, and payments. Strong background in Java, Spring Boot, microservices, distributed systems, cloud-native architecture, and full-stack web development. Experienced in leading onshore/offshore teams, translating business needs into scalable technical designs, and improving reliability, security, performance, and developer productivity across complex production environments.

CORE COMPETENCIES

Backend: Java, J2EE, Spring Boot, Spring MVC, Hibernate, REST, SOAP, WSDL, JMS, JDBC	Frontend: React, Next.js, AngularJS, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, jQuery
Cloud: AWS, GCP, Kubernetes, GKE, EKS, Docker, Podman, Terraform, Cloud Run, Lambda	Data: Oracle, PostgreSQL, MySQL, MongoDB, DynamoDB, HBase, Hive, Kafka, Spark, Redis
DevOps: Maven, Ant, Jenkins, GitHub, SVN, CI/CD, Prometheus, Grafana, Splunk, Honeycomb	Security: OAuth 2.0, SAML, OIDC, IAM, HashiCorp Vault, CyberArk, SFTP, APIGEE

PROFESSIONAL EXPERIENCE

Equifax - Employment Data Analysis

March 2026 - Present

Senior Software Engineer

- Lead Agile planning and delivery for enterprise employment-data initiatives across Product, QA, Systems Engineering, and stakeholder groups.
- Author HLD/LLD documentation, class diagrams, sequence diagrams, and business requirements for extensible external-client integrations.
- Modernized security by implementing encryption, secure SFTP workflows, and migration from CyberArk to HashiCorp Vault.
- Built SOAP web services and WSDL contracts supporting multi-client requests, dynamic data-source keying, and resilient error handling.
- Developed Oracle stored procedures and Hibernate/Spring persistence workflows for business-critical order capture and DB-level logging.
- Automated batch processing and data transfers with GCP Airflow/Dataflow plugins, UNIX shell scripting, Maven, Ant, and CAPE CI/CD.

Verizon - Fixed Wireless Access**Jan 2025 - Mar 2026****Full Stack Engineer / Infrastructure Architect**

- Led a global team of 9 across onshore/offshore groups and served as primary technical point of contact for stakeholders.
- Owned end-to-end SDLC for a technician-facing 5G installation and activation suite from requirements through production support.
- Architected full-stack applications using Java, Node.js, React/Angular, and microservices for real-time 5G router provisioning.
- Implemented federated Prometheus monitoring, custom Linux exporters, and service discovery, reducing monitoring onboarding by 80%.
- Built Redis-backed real-time leaderboards, profile caching, and high-throughput rate limiting with atomic counters and sliding-log patterns.
- Designed GCP architectures incorporating HA/DR, hybrid connectivity, BigQuery, Dataflow, Pub/Sub, IAP, Cloud Armor, and Confidential Computing.
- Improved observability with Honeycomb high-cardinality tracing, Splunk centralized logging, and CloudWatch composite alarms.

Verizon - Network Performance Intelligence | Alpharetta, GA**Aug 2023 - Dec 2024****Senior Full Stack Engineer**

- Automated GCP infrastructure using Terraform, GKE, Cloud Storage, Cloud SQL, Cloud Functions, VPCs, firewalls, and autoscaling.
- Migrated on-premise workloads to GCP, improving availability to 99.9% and reducing infrastructure costs by 25-40%.
- Built Spring Boot microservices for high-volume batch processing, traffic monitoring, and field-network intelligence workflows.
- Developed Spark batch/streaming jobs and Kafka, Pulsar, and Storm pipelines for high-throughput network performance data.
- Built Python automation and services with FastAPI, Flask, Boto3, PySpark, Avro, and Kafka Connect for provisioning, CDC, and data operations.
- Implemented Grafana, Loki, Tempo, SLIs, and SLOs to connect metrics, logs, traces, and business KPIs.
- Migrated SQL workloads to Amazon Aurora and built AWS Glue ETL pipelines into S3 data lakes with Glue Catalog and Crawlers.

TSYS & Global Payments | Alpharetta, GA**Feb 2022 - July 2023****Sr. Java Developer / Web Developer**

- Developed CI/CD pipelines for AWS-hosted applications using Terraform, Bash, GitHub, and automated environment provisioning.
- Designed microservice security using Spring Boot, Spring Security SAML, vulnerability management, and high-availability AWS operations.
- Led a React, TypeScript, and Tailwind CSS design system adopted by 12+ teams, reducing UI delivery effort by 50%.
- Engineered state management with Zustand and React Query, eliminating redundant API calls and resolving real-time dashboard race conditions.
- Implemented micro-frontends with Module Federation for independent deployment of product modules in a unified React ecosystem.
- Built SSO capabilities using SAML 2.0, OIDC, MFA, adaptive authentication, and centralized identity platforms.

FedEx | Pittsburgh, PA**Oct 2020 - Feb 2022****Sr. Java Developer**

- Led offshore delivery for two enterprise applications, coordinating design, development, code review, testing, and releases.
- Developed Spring Boot REST APIs and refactored microservices to improve maintainability and reduce code complexity.
- Implemented Docker and Nginx deployment patterns to support continuous delivery in high-scalability environments.
- Designed MongoDB schemas, complex JSON models, optimized SQL procedures, and improved database-query performance.
- Built Kafka producers/consumers with retry and error-handling patterns and Redis caching for sub-100ms regional responses.
- Supported OAuth 2.0 integrations with PKCE, least-privilege scopes, secure token refresh, and third-party SaaS synchronization.

Tractor Supply Company | Nashville, TN**Feb 2019 - Aug 2020****Sr. Java Developer / Web Developer**

- Designed n-tier applications using Core Java, Spring Boot, Spring ORM, UML, and J2EE design patterns.
- Built REST/SOAP integrations with API versioning, JSON structures, JMS workflows, and C++ service clients.
- Managed AWS-hosted web applications, S3 structures, CloudTrail logs, Apache servers, Jenkins builds, and release support.
- Developed AngularJS applications with two-way binding, DOJO widgets, AJAX support, and standardized UI structures.
- Architected Next.js and React solutions using App Router, SSR, ISR, React Server Components, Apollo Client, and custom hooks.

Walmart | Bentonville, AR**Mar 2015 - Sep 2017****Software Developer III**

- Developed JEE web services using SOAP, WSDL, UDDI, Spring MVC, Hibernate DAO classes, and Spring IOC integration.
- Built TIBCO BusinessWorks interfaces in fault-tolerant and load-balanced modes and configured TIBCO Administrator, Hawk, and adapters.
- Created XSD schemas and transformation processes for XML and proprietary data exchange across distributed workflows.
- Developed AngularJS, Backbone, RequireJS, JSP custom tags, JavaScript, Ruby, and Python utilities for web applications and automation.
- Supported MongoDB administration, data modeling, JavaScript DML operations, imports, exports, ad-hoc backups, and health monitoring.

EDUCATION**Master of Science in Computer Science****2018 - 2019**

Southern University and A&M College, USA | GPA: 3.8/4.0

Bachelor of Technology**2010 - 2014**

Manav Bharti University, India | GPA: 3.6/4.0
